### **FOR IMMEDIATE RELEASE**

#### **UGA Fall Engineering & Computer Science Career & Internship Fair**

The University of Georgia announces the upcoming Fall Engineering & Computer Science Career & Internship Fair on Tuesday, September 24th from 3:30 p.m.-7:30 p.m. at The Classic Center. This internship fair offers students a valuable opportunity to connect with employers actively seeking candidates for internships, co-ops, and full-time positions.

The internship fair is open to all UGA undergraduate students, graduate students, and alumni. This event is designed to encourage networking and career exploration within the field of engineering and computer science.

“The internship fair is a great way for current students majoring in engineering and computer science at the University of Georgia to make connections with professionals in their industry. This event provides a unique opportunity to meet potential future employers and discover several opportunities available for future graduates,” says Elijah Rector, a computer science student at the UGA who has attended the event in the past.

Shuttle services will be available to transport students from campus to The Classic Center from 3:00 p.m. to 7:00 p.m., with stops at the Driftmier Engineering Center, Soule Hall, and The

Classic Center. All attendees are asked to dress in professional business attire and to bring printed copies of their resumes.

Don't miss this chance to kickstart your career. For more information, visit

#### UGA Boilerplate

UGA is the oldest state-chartered institution of higher education in the United States. Spanning more than 750 acres on its main campus alone and employing almost 3,000 faculty members, UGA provides educational and research services to over 40,000 individuals, including almost 10,000 doctoral and professional students. With \$546 million in annual research expenditures, and NIH awards totaling \$90 million annually, UGA has an estimated \$8.1 billion annual impact on the economy of Georgia. UGA's 18 colleges offer doctoral degrees in 99 areas spanning the liberal arts and humanities; business; journalism; public affairs; law, education, and social work; and include science-based colleges for veterinary medicine, ecology (the first stand-alone college of its type in the world), public health, pharmacy, engineering, and agriculture. The first cohort of medical students was admitted in 2010 to the Augusta University/UGA Medical Partnership, sharing the site of the former Navy Supply Corps School with UGA's College of Public Health in Athens, GA.
